Be the Bridge

I have been fascinated with bridges my entire life, intrigued that two lands can be joined by a structure that provides a foundation for people to cross safely -- to meet and talk, to exchange goods, services and ideas, and to grow their communities. Whether it's the log that helps us cross over a creek, or the maze of over- and underpasses called "spaghetti junction" that impacts people going in all directions, or the Jekyll Island Bridge that allows us to travel over the ships that pass below -- bridges are beautiful, powerful and fundamental to crossing waters both calm and troubled.

Building bridges with employers leads to people with disAbilities landing jobs with career potential. Building bridges with teachers helps incorporate AT into classrooms and means more students being fully integrated into their educational settings. Building bridges in the community helps people become actively involved in all aspects of where they choose to live.

Building bridges means being open to others and creating communication that can lead to new opportunities. While it's not always easy to build bridges, doing so is undeniably linked to success in both the disAbility community and the larger one. The secret to a strong bridge is building it with a true desire to connect and grow beyond the existing boundaries.

My bridge-building efforts have had mixed results. Some were easy to build because of a common belief in equal rights for all people; others because of a common mission seeking independence for all individuals, and still others because of the positive power of assistive technology. But I also have half constructed bridges, where I have reached out to an individual or organization and stand ready to meet them when they are ready ...and some day they will be ready.

I know it gets tiring, reaching out to organizations and individuals who don't reach back as you try to build that bridge. But, if not you, who? Don't give up -- speak up, speak out and let others know about the bridge you are trying to build.

I have been thinking about the small ways each of us can celebrate the 20th Anniversary of the ADA. Perhaps a really good way is to make a personal commitment to build a bridge to at least one other person, or one community or social group to which we belong, and to educate those people about the power of inclusive language and disability awareness. . . to challenge them to break the cycles of discrimination that lead to misunderstanding, disdain, exclusion and unemployment. Or to build a bridge to Facebook with a clear message about making it more accessible to those of us who use assistive technology for computer and internet access. Or to simply tell a favorite restaurant that it needs to re-examine its accessibility.

As we celebrate the 20th anniversary of the ADA, I encourage you to Be the Bridge. . . be one who makes a difference.

Yours in the Struggle & the Hope!

AT Spotlight

By: Martha Rust

Ginger

While recently cruising around the exhibit hall at an assistive technology expo, I stumbled upon *Ginger*, an online software program that corrects both spelling and grammar. I was immediately impressed with how easy it was to check grammar context with both auditory and visual feedback. *Ginger* also creates progress reports so you can track your most commonly made grammatical mistakes and misspelled words.

There is a downloadable 14-day free trial available at www.gingersoftware.com. If you decide to purchase *Ginger*, monthly payments are as low as \$6.00. All Tools for Life ATRCs now have *Ginger* available for demonstrations. To find your local ATRC, go to the www.gatfl.org home page and click on Locate Your Local AT Resource Center.

The *pebble* is a new and innovative handheld video magnifier that has the functions of many magnifiers in one lightweight, portable device. This magnifier is perfect for those always on-the-go or for anyone who desires a more compact design. With the *pebble* you will benefit from many functions such as the adjustable and foldable handle, adjustable magnification, 6 color-contrast modes and large viewing area. This small device is powered by AA batteries. The *pebble* sells for \$595.00.

Tools for Life Website: Training Update

By: Liz Persaud

As you have visited the Tools for Life website www.gatfl.org in the last few months, we hope you have noticed some minor changes and additions. One of our most recent and important additions is the Training Page, which offers visitors information on training from the TFL State Office as well as from the ATRCs.

To access the Training Page, click on the Training link on the home page menu or go directly to www.gatfl.org/Training.aspx. Select one of the training topics from the list displayed that piques your interest, or just scroll down the page to see a detailed description of each specific training offered.

When you are ready to submit a training request, simply click on the training request link to access a training request form. Fill out the information based on your needs and we will contact you to schedule a time and work on other details. If you are interested in a training or particular subject that is not listed, or if you have a unique request, feel free to contact us; we might just be able to work something out.

The TFL team continually improves the website as we develop more projects and serve the community. Please visit us often to see more exciting additions coming soon!

For more information on TFL Trainings and Events, please contact Liz Persaud at Liz@gatfl.org.

AT Funding and Resources for Military Members and their Families

By: Rhonda Perling

With the continued conflict overseas, TFL is experiencing a high demand in services for our servicemen and women and their families. Here are some resources that may be of help:

The Computer/Electronic Accommodations Program (CAP) within the Office of the Assistant Secretary of Defense (Health Affairs) provides free assistive technology (AT) and services to federal employees with disabilities, wounded service members, federal managers, supervisors, and IT professionals, increasing employment opportunities and access to the information technology environment in the U.S. and abroad. CAP is currently working to remove barriers to federal employment opportunities by eliminating the costs of assistive technology. For more information, visit www.tricare.mil/cap.

The Fisher House provides housing accommodations to family members of injured military, allowing them to be close to loved ones during hospitalization for an illness, disease or injury. *The Fisher House* also supports both active troops and veterans during their care and rehabilitation at military installations and VA medical centers around the world. Visit www.fisherhouse.org for more information.

Our Military Kids provides tangible support to children of deployed National Guard and Reserve personnel as well as to children of injured service members through tutoring and grants for enrichment activities that help children cope with the stress of having a parent in a war zone or recovering from injury at home. *Our Military Kids* grants are made to ensure that military children have access to sports, fine arts, and academic tutoring programs. Visit www.ourmilitarykids.org for more information.

For more information about these programs and many others, please contact Rhonda E. Perling, at 404-235-0142 or rhonda@gatfl.org.

Tools for Life in the Community

By: Liz Persaud

This year the Tools for Life team has been working on ways to be more visible in our community and to connect with the individuals and families we serve more often. We recently created a Facebook page and are quickly building quite a fan base. Facebook allows us the opportunity to post real time updates, photos, and our activities in the community. This has been a great way for us to receive instant feedback and provide a platform for discussion about assistive technology not just here in Georgia, but all over the country. So next time you log in to Facebook to update your status, be sure to “friend” us so you can see what we’ve been up to!

There is a direct link to the Tools for Life Facebook page on the TFL website, www.gatfl.org.

For more information on TFL events, please contact Liz Persaud at Liz@gatfl.org.

Tools for Life Data Corner by Connie Freier

The numbers continue to grow for Tools for Life. The Online Data Collection System continues to improve and capture the extensive data necessary to increase public awareness and information

and assistance. The TFL numbers have increased by over 1000 individuals assisted this last year as compared to the past three years. That is a significant increase in the number of people getting the information and assistance they need to make better choices in community living, education,

employment, health and assistive technology. Currently, we are working on improving the data collected that is required by the National Information System for Assistive Technology (NISAT),

the Data Collection Instrument and Performance Report for Statewide AT Programs. The data collected allows TFL to grow and develop new projects. For more information about TFL Data please contact Connie Freier at Connie@gatfl.org.

Data Details

January 2010 through December 2010

3,489	Georgian's received Direct AT Services
40,796	Georgian's received Information and Assistance
2,861	Participated in Personalized AT Training/ Tech Assist Workshops
258	Vocational Rehabilitation Clients Assisted AT

Loan Library

634 Pieces of AT Borrowed

ReBoot - Computer Reuse Program

475 Computers Placed

8,700+ Total Computers Placed from 1994 - 2010

Tools for Life Network

Services include an initial interview, information and assistance, device demonstration, equipment lending library, assessments and training.
