The Importance of Play

• The work of children
  • A type of learning
• The foundation for all growth and development
• Important area for therapeutic intervention
• Benefits of participating in recreational activities:
  • Develop skills and competencies (i.e. initiative)
  • Form relationships and develop social skills
  • Self esteem, self efficacy, self determination
  • Develop self identity
  • Acquire a sense of meaning and purpose in life
  • Greater mental, physical and social well-being
Barriers to Play

• Building and playground design, physical access
• Transportation problems
• Financial concerns
• Lack of properly trained personnel
• Lack of appropriate equipment
• NOT disability in and of itself, but factors in the environment
Research

• Activity preferences
  • Preferred: Physical and recreational activity, formal activities
  • Actual: Self-improvement activities, informal activities
  • Incongruence shows lack of self-determination

• The impact of nature
  • Best predictor of physical activity in early childhood
  • Accessibility of nature
  • Indoor, sedentary childhood
  • Increases chances of physical and mental health problems

• Mental health in children with chronic disabilities
  • 3.4 times greater risk of psychiatric problems
  • 5.4 times greater risk of being socially isolated
  • Play is a protective factor!
Main Take-away

Lack of play opportunities can lead to secondary physical, social, emotional, and psychological disabilities.
