

Using iPads to Support Student Participation in the IEP

Ben Satterfield, Ed.D., Center for AT Excellence

Carolyn Phillips, M.Ed. ATP, Director, GA Tools for Life

This project was administered and funded by the Middle Georgia GLRS, Linda Curry, Director

Georgia Tools for Life

www.gatfl.org

www.amacusg.org

This Session is being Recorded

You will be able to access the archive of this and other webinars at www.gatfl.org

Credits

- **CEUs** are approved for .15 clock hours and are administered through Georgia Tech Professional Education
- **CRCs** are approved for 1.5 clock hours and are administered through the Commission on Rehabilitation Counselor Certification
- To receive your verification form, send an e-mail with the webinar title and date, your full name, organization, city, state, e-mail address and date of birth to Liz.Persaud@gatfl.gatech.edu

Webinar Evaluation

At the end of today's webinar, we ask that you please take a moment to complete our survey:

<https://www.research.net/s/TFLwebinar>

Join us for Upcoming Webinars!

- Thursday, August 29 from 3:00PM to 4:00PM EST – TFL/CREATE: Support for Your AT Consideration Process, presenters: Ben and Pat Satterfield
- Tuesday, September 10 from 3:00 PM to 4:00 PM EST - TFL/CREATE: Getting and Using Accessible Instructional Materials (AIMS): What You Need to Know, presenters: Ben and Pat Satterfield

Visit www.gatfl.org for the full schedule.

Sign up on the TFL mailing list to receive our email announcements or send an email to Liz - liz.persaud@gatfl.gatech.edu

Agenda

- Tools for Life Overview
- What Research Tells Us about Student Led IEPs
- Research Collaboration
- Research Design and Methodology
- Results
- Comments from Participating Staff and Students
- Conclusions

AMAC

AMAC Accessibility is a social change organization on a mission to create affordable services for governmental, private and non-profits organization working with individuals with disabilities. Services include e-text, braille, captioning, assistive technology, office management software and consulting.

Accessibility Made Smart

AMAC creates practical solutions that work, with a focus on utility, ease of use, and high quality.

- **Accessibility Consulting** focuses on organizational accessibility needs with evaluation, technical assistance, customer support, and website accessibility solutions.
- **Braille Services** produces customized projects from both print materials and electronic text including partial books and chapters or graphics only using cutting-edge technology.
- **Captioning Services** makes classrooms, meetings, labs and other audio environments fully accessible for deaf or hard-of-hearing.
- **Professional E-Text Producers** provide high-quality e-text in many formats such as PDF, DOC, DAISY, and HTML.
- **Certified Assistive Technology team** provides on-site and remote assessments, demonstrations, training and technical assistance for education, work, and daily living environments.

For more information, please visit our website at www.amacusg.org

Tools for Life Mission

We're here to help Georgians with disabilities gain access to and acquisition of assistive technology devices and assistive technology services so they can live, learn, work, and play independently in the communities of their choice.

Tools for Life

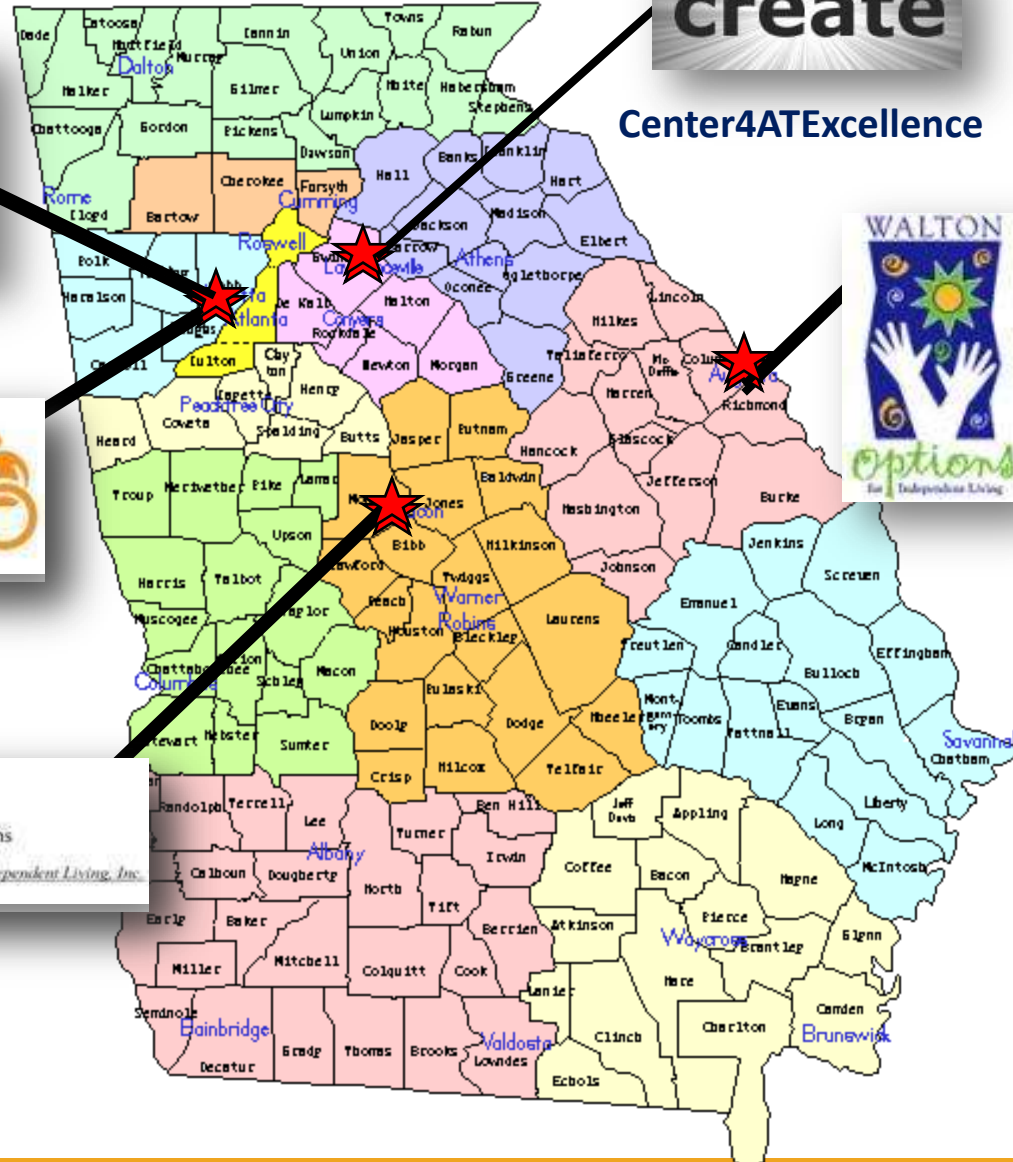

Georgia's Federal AT Act Program

- TFL developed Georgia's Plan for AT
- We serve individuals of all ages & all disabilities in Georgia
 - Over 50,000 thru various activities throughout the year
- TFL Network
 - Assistive Technology Resource Centers
 - Lending Libraries
 - Training and Demonstrations
 - AT Reuse
 - AT Funding Education/Assistance and Resources
- Online Resources
 - www.gatfl.org - 12,000 unique visitors a month

Tools for Life Network

- AT Lending Library
- AT Evaluations & Training
- AT Demos
- Resource and Assistance
- AT Funding Assistance
- DME Reuse

Center4ATExcellence

Who are We Serving

Over 54,000,000 individuals in the United States have disabilities that affect their ability to:

- see
- hear
- communicate
- reason
- walk
- perform other basic life functions

People with disabilities are the largest minority group in America.

This group cuts across racial, ethnic, religious, gender and age boundaries.

Anyone can become a member of this minority group at any time.

Research on Student Led IEPs

Students who participate in their IEP meeting:

- Have been shown to be more likely to reach goals (Agran & Hughes, 2008; Arndt, Konrad, & Test, 2006; Martin, Van Dycke, Christensen, Greene, Gardner, & Lovett, 2006;)
- Tend to demonstrate enhanced communication and self-advocacy skills (Mason, McGahee-Kovac, Johnson, & Stillerman, 2002).

Research on Student Led IEPs

Students who participate in their IEP meeting:

- Improved academic performance (Schunk, 1985).
- Have elevated rates of completion of high school (Benz, Lindstrom, & Yovanoff, 2000).
- Positive outcomes upon employment and quality of life as students become adults (Furney & Salembier, 2000; Halpern, Yovanoff, Doren, & Benz, 1995; Wehmeyer, Agran, & Hughes, 2000).

Extent of Student Led IEPs

- A body of resource material has emerged during this period to describe the steps in preparing students for participation in their meetings. (Konrad, 2008; Konrad, & Test, 2004; Mason, McGahee-Kovac, & Johnson, 2004)
- Students who do lead their IEP meeting regularly describe their experience was one of the most memorable learning experiences of their year. (Hawbreaker, 2007)
- However, the practice remains under-utilized (Stanberry, 2010)

AT and Student Led IEPs

- Stanberry (2010) suggested that the use of technology in student-led IEP meetings could help provide motivation for students to take a more central role in the planning and conduct of these meetings.
- Case studies presented appeared to indicate elevated involvement in meeting preparation and leadership.

Research Collaboration

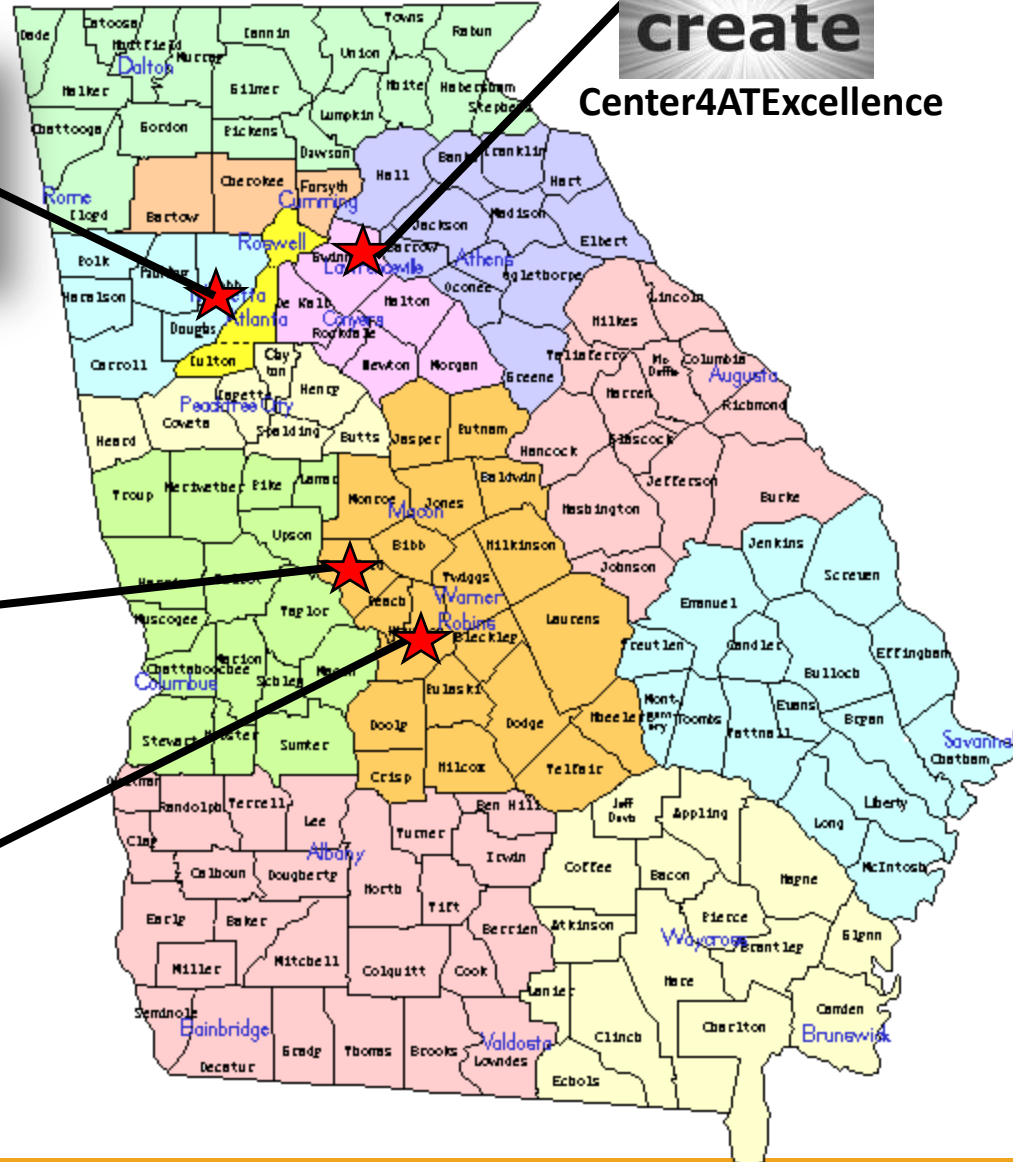

- Middle GA GLRS
- Crawford County High School
- GA Tools for Life
- Center for AT Excellence

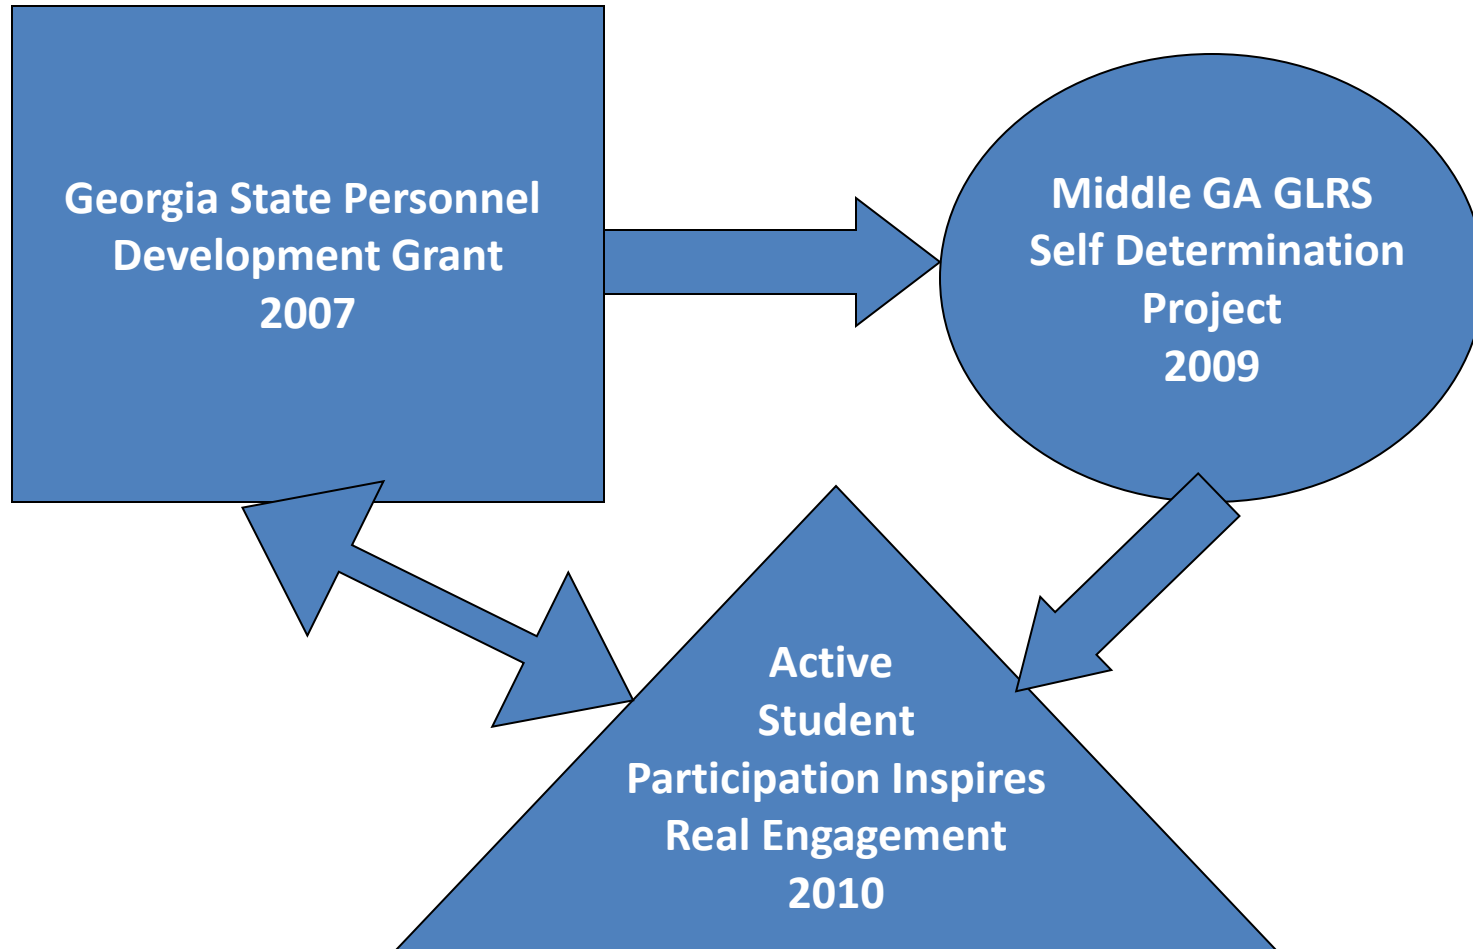

Middle Georgia

Center4ATExcellence

Initiatives

Research Question

- Will the use of iPads for the preparation for and participation in IEP meetings lead to greater student leadership and participation in the IEP meeting?

Research Team

- **Linda Curry**, Director Middle Georgia GLRS
- **Laura Meldrum**, Teacher/Transition Specialist, Crawford County Schools
- **David Shepard**, Lead Teacher-CTAE, Crawford County Schools
- **Ben Satterfield, Ed.D.**, Research Consultant with Center for AT Excellence / GA Tools for Life

Research Methodology

- 12 Students would go through ASPIRE training as a group.
- Students would be divided into two groups:
 - 6 Students would be provided with iPads
 - 6 Students received no technology
- All students would lead their IEP meeting
- Survey taken following IEP
 - Students, parents & staff all take part
 - Rate student's participation & leadership

ASPIRE: Active Student Participation Inspires Real Engagement

- ASPIRE is a curriculum that seeks to foster active student participation in their IEP meeting, by providing the student with skills to direct and lead their meeting (Lynch, Crain & Moore, 2012).
- ASPIRE was adapted from the “I’m Determined Project” of the Commonwealth of Virginia Department of Education Training and Technical Assistance Centers. This approach was embraced and piloted by the Georgia Department of Education (GADOE).
- GADOE had selected 14 districts for a broader implementation of the principles of ASPIRE under the Partnership for Success program.

Curriculum

- Modified ASPIRE curriculum
- 10 lessons, some of which extended to multiple days
- Lessons delivered in Teachers-As-Advisors setting
 - Once a week
 - Approximately 40 minutes in duration
 - All students moved to Transition Specialist/ Teacher's advisement for consistent instruction
- Follow up in class setting
 - Some students had daily access to CTAE Teacher
 - All students had daily access to Transition Specialist/ Teacher

Curriculum

- ASPIRE Lesson #1 (“Deciding My Dreams”)
- Goal Setting & Goal Assessing
- Transition Planning Questionnaire & Review
- Self-Advocacy Checklist (from ASPIRE) with Self-Advocacy Exploration
- SPED Accommodations Assessment
- Skills for Classroom Success (from Bartow County) with Assessment
- CCHS Credit Balance Sheet
- IEP Guide Questions (adapted from NICHCY’s “A Student’s Guide to the IEP”)
- Understanding and Personalizing the PLOP
- Writing Invitations for the Transition Planning and IEP Meeting

Survey

- Based upon Post-IEP Meeting Survey instrument (Martin, et.al. 2006)
- Students' participation evaluated in these areas:
 - Prior knowledge
 - Transition Issues
 - Meeting Behaviors
 - Positive Perceptions
 - Leadership
- Based on 5-Point Likert Scale (1 least, 5 most)

Treatment Group

- Treatment group was provided with iPads and training for the purposes of:
 - collecting work examples
 - preparing & delivering presentations at the IEP mtg.
- Technical assistance and training in the use of the iPad was provided to the students over a 6 month period:
 - 2 whole-group trainings
 - 4 sets of meetings with students individually or in small groups to address specific issues.

iPads

iPads were provided to students by the MG-GLRS

- iPad version 2 equipped w/ camera.
- Survivor protective casings were provided along with a stylus.
- In addition to those that come standard on the iPad, apps provided included:
 - Keynote
 - Dragon
 - Inspiration
- As the project proceeded students requested access to apps such as:
 - G Docs
 - Google Drive
 - Quickoffice
 - Documents

RESULTS

- Prior Knowledge – iPad group scored slightly higher (mean scores 4.800 to 4.400)
- Transition Issues – iPad group scored slightly higher in general.
 - Much higher with regard to
 - plans for after high school,
 - supports needed after HS,
 - services in community

RESULTS

- Meeting Behaviors – IEP Group was seen as slightly better – but viewed particularly better when talking about personal strengths and needs.
- Positive Perceptions- slight differences: iPad group seen as more comfortable expressing thoughts and feeling good about meeting outcomes. Otherwise very similar scores.

RESULTS

- Leadership – area of most significant differences
 - introduced themselves
 - introduced team members
 - stated the purpose of their meeting
 - reviewed recent progress
 - asked for feedback
 - asked questions when they did not understand
 - identified needed supports
 - expressed personal interests
 - described their own skills and limits
 - closed the meeting by thanking those in attendance

COMMENTS FROM STAFF

- “The students who had iPads seemed to grow in confidence. They were proud to have the device. It was a boost to their self-esteem. Now they were special.... But, this time, for a good reason.”
- “The students demonstrated a sense of responsibility for the iPads.”

COMMENTS FROM STAFF

- “The students’ use of the iPad (presenting slides and talking about their plans and ideas) made for a more effective IEP meeting. The focus of the meeting was more on the student. The IEP was about what the student is doing instead of what we (the staff) will do for the student.”

COMMENTS FROM STAFF

- “These students’ IEP meetings were phenomenal. They presented themselves in a way we had never seen them before. In the way they spoke... some had only spoken when they responded to a direct question in class.”
- “There was more self-advocacy than ever before. They really spoke up.”
- “It seemed like the project gave them a voice they didn’t know they had. I think some just realized what they were capable of..”

COMMENTS FROM STUDENTS

- “It was better to show it than to describe it all yourself.”
- “Then you are actually just saying it to the person – in your own words – just talking like telling them how you feel.”
- “You show it as you go. It helps everyone else who is looking at it put the pieces together more quickly than if I try to tell them.”
- “That way they know what you are talking about and you can go into more detail about what you are doing.”

COMMENTS FROM STUDENTS

- “You already had the information on the iPad.... so all you have to do is hook it up to the [Promethean] board. And its right there. And you just talk about it as you go.”
- “It helps get your thoughts out there better than you just trying to get it from scratch... better than just writing it on a piece of paper.”

COMMENTS FROM STUDENTS

- “The iPad made me prepare. So I felt more prepared at the meeting. Afterwards, I felt like I had accomplished something.”
- “It’s not only that I know where I am going, [I know] its going to be me that makes it happen!”

Conclusions

- The presence of the iPad platform likely made a difference in two respects:
 - Setting the students apart as special in a positive way and providing them a sense of responsibility and purpose in this project.
 - Laying a foundation on which confidence was built as they developed a presentation that contained their ideas on this platform.

Conclusions

- The modified ASPIRE training provided students in both groups with the background understanding for participation in their meeting. Each student demonstrated that they understood the key questions to address in their meeting.

Conclusions

- The technical assistance sessions in preparation for their meeting provided students with the opportunity and support to craft their personal responses to the key questions. This step forced them to address these questions.

Conclusions

- The centrality of the student's own ideas at the meeting, presented in multimedia form, together with the acceptance from staff and parents, provided a further encouragement to students to be assertive and provide leadership at their meeting.
