Accessibility Made Smart

AMAC creates practical solutions that work, with a focus on utility, ease of use, and high quality.

- **Accessibility Consulting** focuses on organizational accessibility needs with evaluation, technical assistance, customer support, and website accessibility solutions.
- **Braille Services** produces customized projects from both print materials and electronic text including partial books and chapters or graphics only using cutting-edge technology.
- **Captioning Services** makes classrooms, meetings, labs and other audio environments fully accessible for deaf or hard-of-hearing.
- **Professional E-Text Producers** provide high-quality e-text in many formats such as PDF, DOC, DAISY, and HTML.
- **Certified Assistive Technology team** provides on-site and remote assessments, demonstrations, training and technical assistance for education, work, and daily living environments.
- For more information, please visit our website at www.amacusg.org

Mission

To help Georgians with disabilities gain **access to and acquisition of** assistive technology devices services so they can **live, learn, work, and play independently in the communities of their choice.**

Guiding Principle

- DisAbility is a natural part of the human experience and in no way diminishes the right of individuals to:
 - (A) live independently;
 - (B) enjoy self-determination and make choices;
 - (C) benefit from an education;
 - (D) pursue meaningful careers; and
 - (E) enjoy full inclusion and integration in the economic, political, social, cultural, and educational mainstream of society in the United States.

Public Law 108-364

Tools for Life, Georgia's Federal AT Act Program

- **TFL developed Georgia's Plan for AT**
 - We serve individuals of all ages & all disabilities in Georgia
 - Over 50,000+ thru various activities throughout the year
- **TFL Network**
 - Assistive Technology Resource & Outreach Centers
 - AT Lending Libraries
 - Training and Demonstrations
 - AT Reuse
 - AT Funding Education/Assistance and Resources

AT Acquisition!

- Tools for Life endeavors to break down the barriers which prevent individuals with disabilities, their families, and service providers from acquiring and effectively using Assistive Technologies to gain greater independence.
- To insure that AT products are available to Georgians with disabilities
- Eliminate Funding Barriers

Who are We Serving

- Over 54,000,000 individuals in the United States have disabilities that affect their ability to:
 - see
 - hear
 - communicate
 - reason
 - walk
 - perform other basic life functions

Public Law 108-364

The TFL Network is Growing!

1 out of every 5

- People with disabilities are the largest minority group in America.
- This group cuts across racial, ethnic, religious, gender and age boundaries.
- Anyone can become a member of this minority group at any time.

Language can Change Everything

What does the word "Handicapped"
mean?

Value-Laden Language

- "Handicapped" is an archaic term (it's no longer used in any federal legislation) that evokes negative images of pity, fear, and more.
- A legendary origin of the "H-word" refers to a person with a disAbility begging with his "cap in his hand."

Words to Avoid

What are some words to avoid that are associated with disability?

Disability Awareness

Disability Negative

Handicapped accessible

Handicapped, crippled, deformed

Quadriplegic, paraplegic,
incapacitated

Wheelchair-bound/
Confined to a wheelchair

The blind

Disability Neutral

Accessible parking
Accommodations

Person with a disability
Individual with a disability

Individual with a spinal cord injury

Person who uses a wheelchair

Individual who is blind or has low
vision

Disability Awareness & Language

Disability Negative

The deaf, deaf and dumb, mute, hearing impaired

Dwarf
Midget

Stroke victim
Suffered from a stroke

Slow
Retarded

Crazy, maniac, lunatic, demented, schizo, psycho

Disability Neutral

Individual who is deaf or hard of hearing

Individual of short stature

Person who had a stroke

Individual with an intellectual disability

Person with a psychiatric disability or with a mental health diagnosis

History of AT Legislation

- 1980s and 90s, the civil and education rights of individuals with disabilities were strengthened.
- "...for all individuals, technology can provide important tools for making the performance of tasks quicker and easier, but for some individuals with disabilities, assistive technology is a necessity that enables them to engage in or perform many tasks."

Assistive Technology Laws

- There are a wide range of laws and policies related to assistive technology (AT) services and devices.
- Following are brief summaries of laws that impact the provision of assistive technology and special education services.
- Federal laws are amended regularly.

Assistive Technology Laws:

- Americans with Disabilities Act (ADA)
Public Law 101-336 [42 USC 12101]
The ADA prohibits discrimination on the basis of disability in employment, state and local government, public accommodations, commercial facilities, transportation, and telecommunications.
 - Title I addresses employment, saying that any employer who has 15 or more employees must offer “equal opportunity” to employment-related activities.
 - Title II applies to state and local governments, and insists that people with disabilities be given equal access to public education, employment, transportation, recreation, health care, and other areas under their control.
 - Title III addresses public accommodations that may be provided by private companies, including private schools, restaurants, stores, hotels, doctors’ offices, etc.
 - Title IV addresses assistive technology specifically, as it requires that telephone companies provide the necessary services to allow people who are deaf or hearing impaired to use telecommunications devices.

AT Laws: Section 508

- Section 508 of the Rehabilitation Act requires that all electronic and information technologies developed and used by any Federal government agency must be accessible to people with disabilities.
- This includes websites, video and audio tapes, electronic books, televised programs, and other such media. Individuals with disabilities may still have to use special hardware and/or software to access the resources.

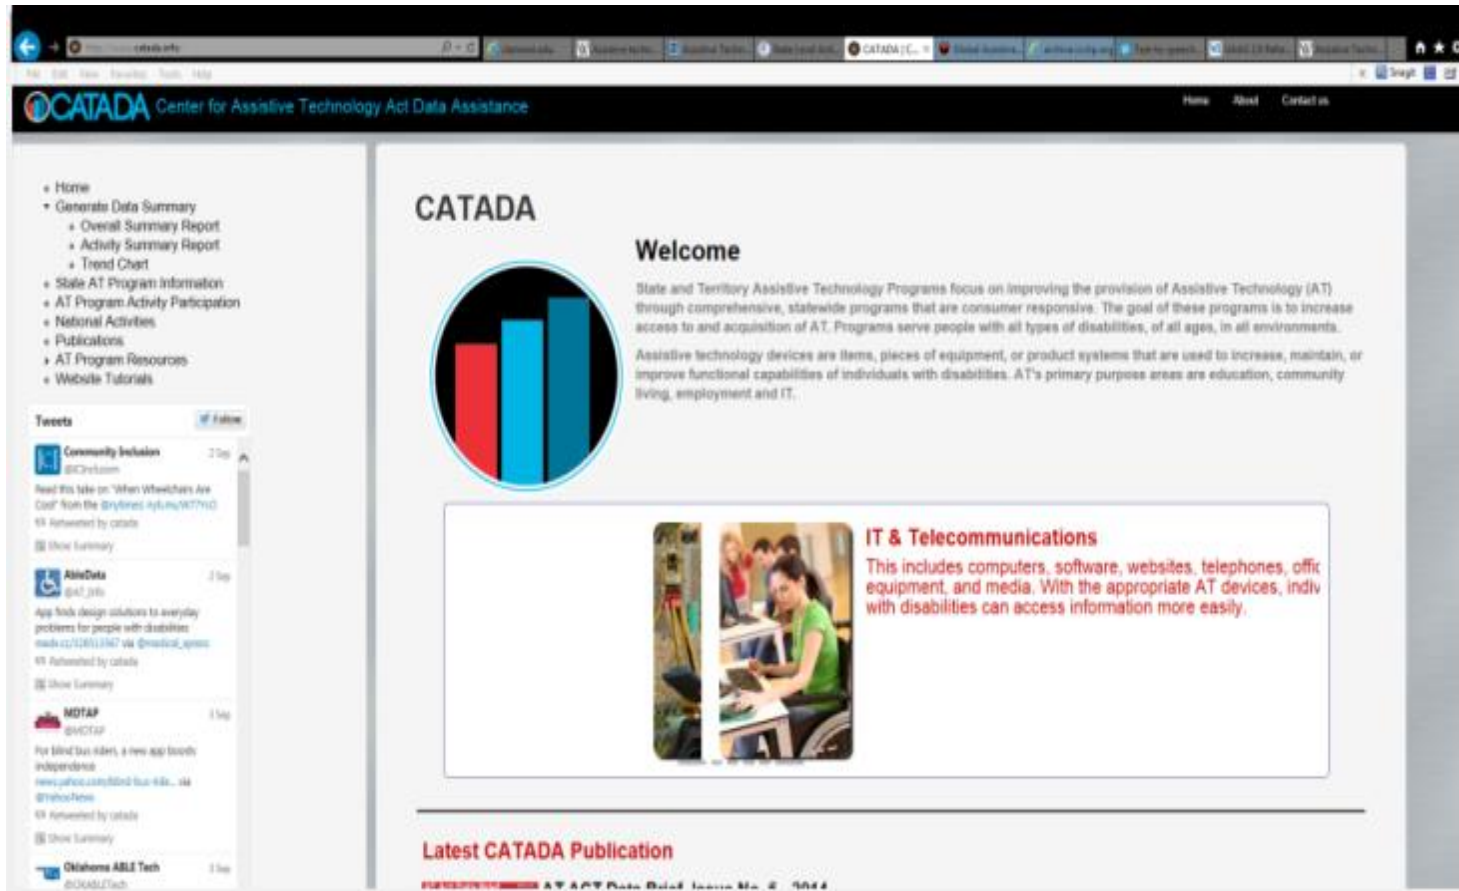

Assistive Technology Laws:

- Individuals with Disabilities Education Act (IDEA).
- The Individuals with Disabilities Education Act (IDEA) was initially passed in 1975, and guaranteed that eligible children and youth with disabilities would have a free and appropriate public education (FAPE) available to them, designed to meet their unique educational needs.

- **Telecommunications Act of 1996**
- **Title I - Public Law 104-104 [47 USC 255]**
This law requires that telecommunications equipment and services be accessible to and usable by persons with disabilities.
- **Title III - Public Law 104-104 [47 USC 613]**
Discusses rules on closed captions and video descriptions of video programming.

- With the 2004 edition, the Act now required States to provide direct services to individuals with disabilities to ensure they have access to the technology they need. As a result, the majority of State efforts are required to be conducted in the following areas:
 - assistive technology reutilization programs,
 - assistive technology demonstration programs,
 - alternative financing programs
 - device loan programs

The screenshot shows the CATADA website interface. The header includes the CATADA logo and navigation links. The main content area features a 'Welcome' section with a bar chart icon and text about assistive technology programs. A sidebar on the left contains a menu of links and a 'Tweets' section with three tweets. A 'Latest CATADA Publication' section is at the bottom, featuring a photo of a woman using a laptop and a link to a publication.

CATADA

Welcome

State and Territory Assistive Technology Programs focus on improving the provision of Assistive Technology (AT) through comprehensive, statewide programs that are consumer responsive. The goal of these programs is to increase access to and acquisition of AT. Programs serve people with all types of disabilities, of all ages, in all environments.

Assistive technology devices are items, pieces of equipment, or product systems that are used to increase, maintain, or improve functional capabilities of individuals with disabilities. AT's primary purpose areas are education, community living, employment and IT.

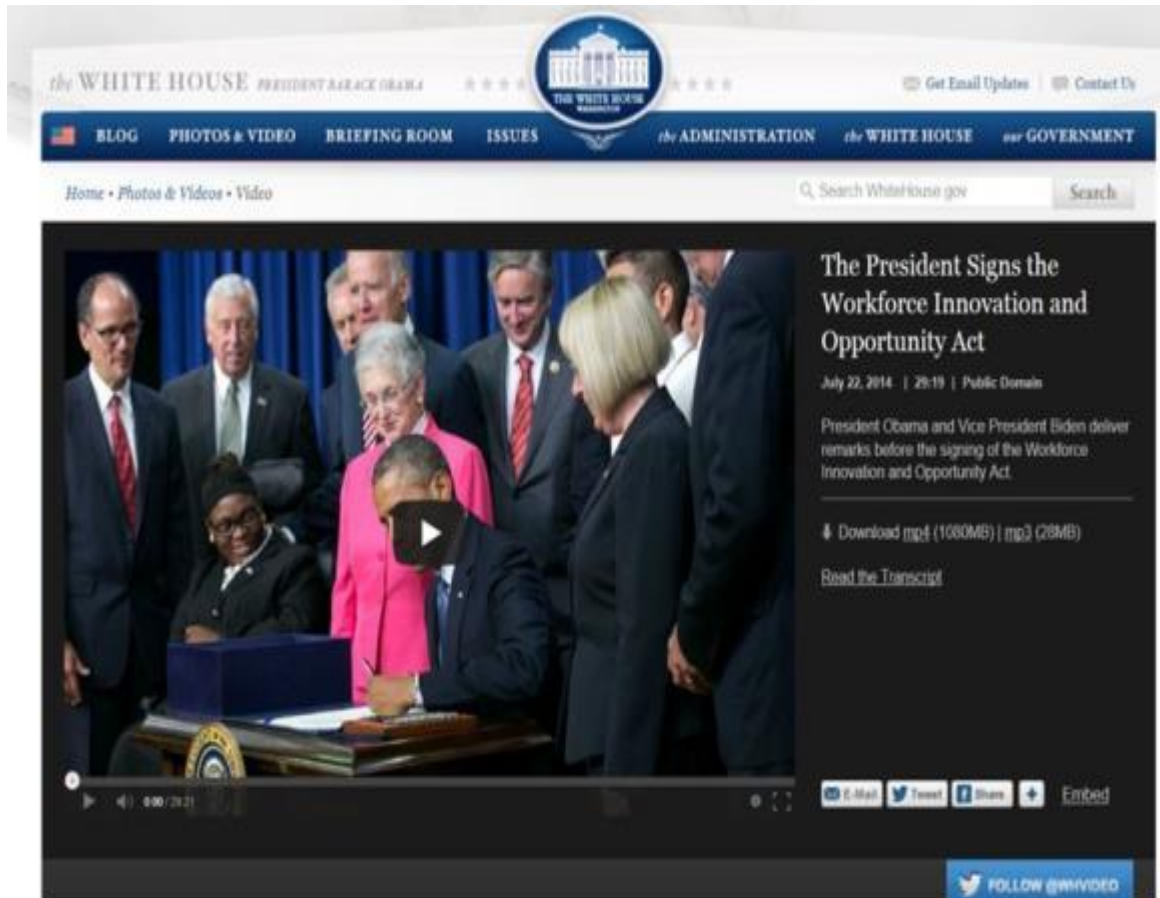

IT & Telecommunications

This includes computers, software, websites, telephones, office equipment, and media. With the appropriate AT devices, individuals with disabilities can access information more easily.

Why Assistive Technology?

- For a person without a disability, technology makes things LIFE easier.
- For a person with a disability, technology makes things LIFE possible.

Exploring Assistive Technology

Staying off the FAST Track!

- ✓ **Frustration**
- ✓ **Anxiety**
- ✓ **Stress**
- ✓ **Tension**

- Lee & Phillips

Defining Assistive Technology

Assistive technology – “Any item, piece of equipment, product system, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve functional capabilities of individuals with disabilities.”

Public Law 108-364

AT Helps!

- Assistive Technology strategies and solutions can help support individuals with a variety of disabilities in all areas of life. AT helps to bridge the gap and provide solutions to problems with:
 - speaking
 - hearing
 - seeing
 - moving around
 - getting places
 - memory
 - cognition (thought processes and understanding)
 - daily living activities, such as dressing and preparing meals
 - socializing

Effective AT Assessment

- Uses a feature-match approach
- Incorporates on-going educational/life planning
- Hanging out with Intent
- Targets natural environments
- Utilizes the competencies of multiple team member
- Demands meaningful follow-through

How do I decide what assistive technology is needed?

Requires consideration of the:

PERSON + ENVIRONMENT + TASK

What activity does the person want to do?

What skills are needed to do the activity?

What skills does the person have to do activity?

What supports exist to help learn a new way?

Where is this activity done and under what conditions?

Assistive Technology Matching: A Team Approach

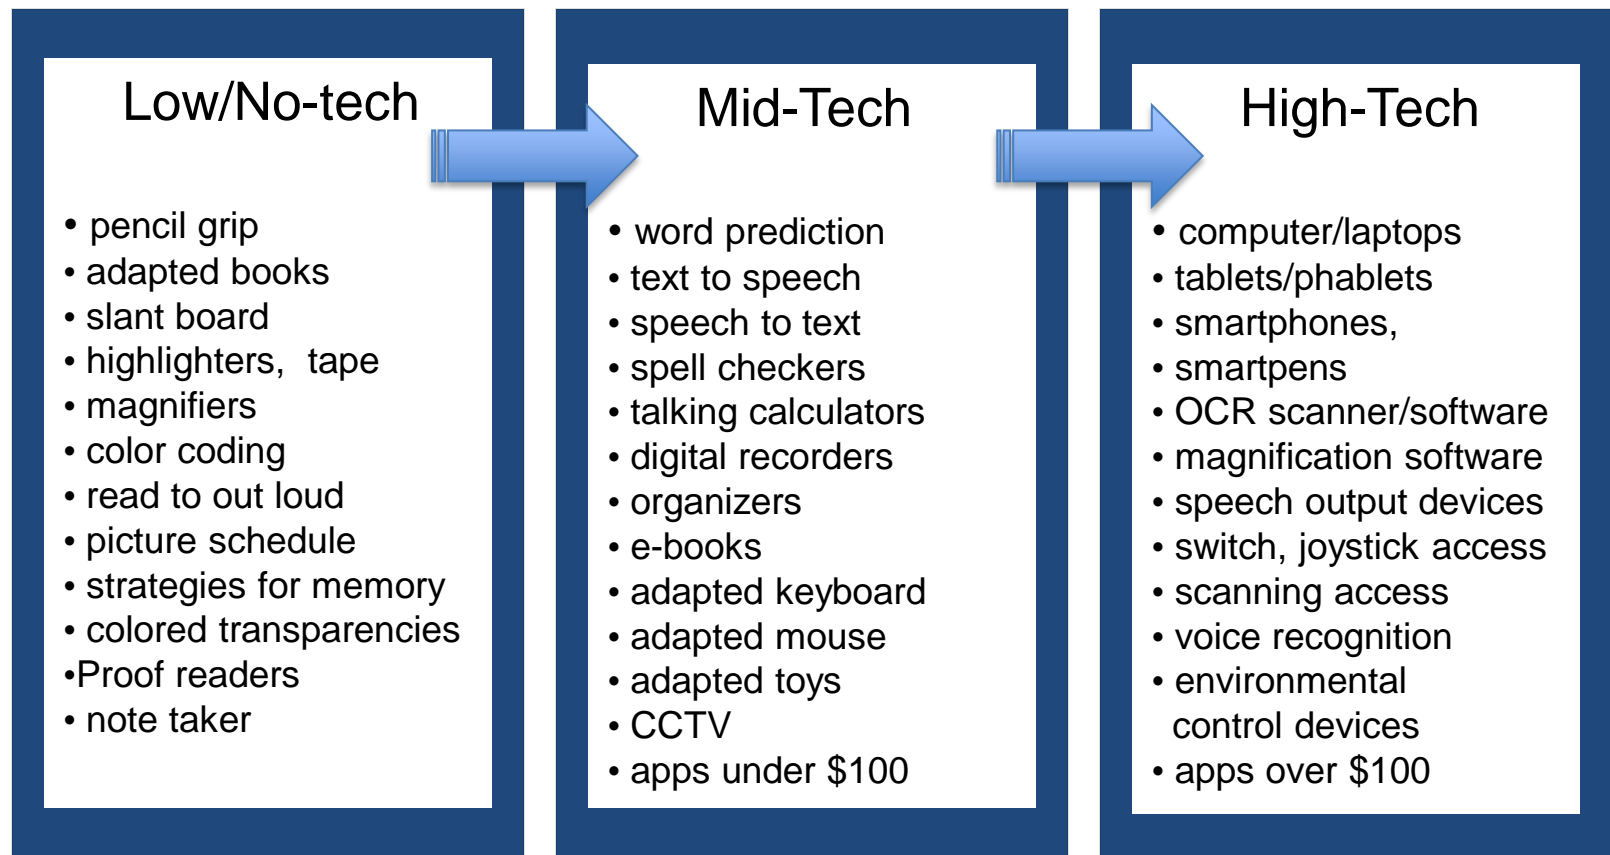

- ✓ The Person with the disAbility
- ✓ Circle of Support – Family of Choice
- ✓ Case Managers
- ✓ Technologist
- ✓ Occupational Therapist
- ✓ Speech & Language Pathologist
- ✓ Physical Therapist
- ✓ Engineer

Assistive Technology Continuum

Observations & “Hanging out with Intent”

Assistive Technology is a **continuum of tools, strategies, and services** that match a person’s needs, abilities and tasks.

Grocery IQ

- Pictorial shopping list
- Customize different lists for different users using pictures on camera roll
- Add your own items and categories
- Assign item prices
- Assign item locations (for example, aisle numbers)
- Several accessibility options
 - text-to-speech
 - uses large easy-to-see images
 - item prices automatically totaled
- \$4.99

Breathe2Relax

- Portable stress management tool
- Detailed information on the effects of stress on the body
- Instructions and practice exercises to learn the stress management skill called diaphragmatic breathing

Tracking Trends

Bestic Feeder

- Bestic can best be described as a small, robotic arm with a spoon in the end that can easily be maneuvered.
- Bestic is small and compact, has an attractive, discreet design and is very quiet which makes it blend into the dining environment in a natural way.
- By choosing a suitable control device, the user can independently control the movement of the spoon on the plate and choose what and when to eat.

Talkitt

- Enables people who have motor, speech, and language disorders to easily communicate using their own voice
- Translates unintelligible pronunciation from any language into understandable speech
- <http://www.talkitt.com/>

- Connects to smartphone via Bluetooth technology
- Foot gestures and voice commands
- Navigation via vibration of the soles, i.e.: left sole turn left
- <http://lechal.com/products.html>

Lumo Lift

- Lumo for back and head/shoulders
- Sends gentle vibration alert when posture needs to be corrected
- <http://www.lumobodytech.com/>

People with Disabilities in the Work Place

Sector: **Business**

VGo increases productivity and effectiveness while lowering costs by enabling a person to get to a location instantly and easily. VGo is not designed as a replacement for in-person interaction but rather as the next best alternative to "being" in the workplace. VGo also eliminates the deficiencies associated with other video solutions that are locked to a TV or computer monitor by providing 100% remote controlled mobility. [delete that](#)

In addition to "being" at work from home, VGo can help people who can get to the workplace, but who cannot practically move about the facility or campus. A VGo can be used to enable a person to move around in one part of the facility while they are physically in another.

The benefits of using VGo in the workplace include

- Getting to places previously inaccessible increases opportunities
- Freedom of movement increases personal interaction with others
- Quality of life improvements by expanding the work and social environments
- Costs can be reduced by lowering or eliminating select transportation expenses, and by communications and speeding decision making

WHAT'S IN THE BOX

Accessible Gaming

TFL Gaming Initiative

- There are many benefits to playing games
 - Improved Hand/Eye coordination
 - Increased problem solving and cognitive function
 - Better handle stressful environments
 - Social outlet
- Tools for Life has recognized the importance of play and is starting an initiative dedicated to gaming with disabilities. Some objectives of the program are:
 - Demonstrate the accessibility of gaming
 - Build relationships with developers and aid in creating more accessible games
 - Increase public awareness of the importance of accessibility in games
